

Tech Rider

Blair Thomas & Company's

Touring production

The Selfish Giant

This tech rider is a list of the preliminary technical requirements for the successful performance of Blair Thomas and Company's *The Selfish Giant*. It is based off of the current plans and projections of the show's production team. This is meant to assist the venue in anticipating the needs of the production but are subject to change. Any variations from the specifications given in this packet are subject to the approval of the Blair Thomas and Company's staff and management. Additional requirements may be needed depending on requirements and limitations of the venue or other local conditions.

blair@blairthomas.org
Cell 262-374-4904

The Selfish Giant

Total Performance Running Time 45 minutes
Performed without an intermission

Total Touring Company of 3
1 Puppeteer
1 Musician
1 Technical Director

Load-In / Set-Up Time
2 hours before performance time

Strike / Load-Out Time
1 hours after the house is cleared

2. Theater and Stage Requirements

Theater

The Selfish Giant needs a proscenium style theater and can play comfortable to an audience of up to 350 seats. It is best on a raised stage floor. Stage floor needs to be 24' wide and 18' deep with a 10' clearance above.

There needs to be an offstage area or pipe and drape 10' x 20' that is hung behind with room for an entrance.

Set Pieces

We have a 4 trunks and a chair that make up the set pieces.

Lighting

The stage area needs a general bright wash for the performance. We travel with no lighting equipment.

Sound

The musician needs a vocal microphone and a microphone for the guitar and a suitable P.A. system for the performance space.

Dressing Rooms

Venue needs to provide well-lit dressing room with access to a mirror and bathroom with a sink.
